Incident 480: NCCIC

Summary

Saw an image posted on instagram, with text from “national council of common law assemblies” stating that “covid regulations have been declared illegal across canada”. Instagram account had Qanon tags in profile.

Investigations all point to [https://republicofkanata\[.\]ca/](https://republicofkanata[.]ca/) (linked to [Name Redacted]) as probable point of origin. Related entities are BBS Radio <https://bbsradio.com/article/national-law-canada-strikes-down-covid-measures-empowers-citizens-resist-officials-ordered> and The Covenanters <https://podcasts.apple.com/us/podcast/here-we-stand-with-rev-kevin-d-anne/id1299484282>

Online references appear to be mostly localised to Canada, although content appears on an Australia-focussed site too ([https://commonlawcourtaus\[.\]org/kanata-common-law-communities-ban-covid-restrictions/](https://commonlawcourtaus[.]org/kanata-common-law-communities-ban-covid-restrictions/))

Spread hasn't been investigated yet.

Suggested things to do: track it backwards and forwards. Backwards: where is this posted, where does it appear to originate? Seed artefact: Search for the image, the logo, the name of the group, the email address, and any distinct text in it (use yandex bing image search to get the text). Check the accounts it's posted on. Start spidering out - are there URLs associated with this, are they part of networks? Forwards: where is this spreading? Which channels, which hashtags, which groups? Is it associated with any known groups, e.g. Qanon or Antivaxxers? Did it hit any superspreaders, and if so, which demographics, countries etc did it go out to? Then counters: which jurisdictions can we report this to. Law enforcement - where? Who? Platforms, registrars etc - which, and what type of evidence do they need? Countermessages: what messages can we counter with (ask the RealityTeam). Did any authority figures take it seriously - can we get countermessages to them? Are there other counters that could be used, other groups that could take those on?
