CTI League Disinformation Readme

What we do

This is the CTI League's Disinformation team. We're here to find, analyse, and coordinate responses to Covid19 disinformation incidents as they happen, where our specialist skills and connections are useful.

Team coordination:
- Slack channel #4-disinformation
- Team discussion/training on zoom Mondays 9-10 PST / 12-1 EST
- Disinformation google drive: team training, process notes etc
- Disinformation github team: team code and kanban boards
- This README
- Triage team: triage googledrive (restricted access)

The people responsible for getting you resources, resolving issues etc are ▨▨▨▨, ▨▨▨▨▨▨▨, ▨▨▨ ▨▨, ▨▨▨▨▨▨, ▨▨▨▨▨▨.

Incident process and tech
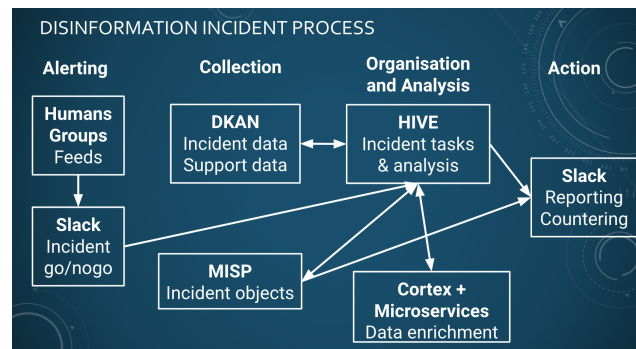

We find and track new disinformation incidents, work out ways to mitigate or stop disinformation incidents and get information to the people who can do that. Our tech stack is:

- D3PO ticketing system: StepByStep: Creating an Incident with D3PO
- CTI League's MISP: we add incident objects here
- DKAN: we add larger incident datasets (and supporting data) here
- Hypothesis: CTI group

This is how to start or join in on an incident
1. In slack, type "/disinfoopenlist". If this incident doesn't, type /disinfonew to start one. (instructions are in StepByStep: Creating an Incident with D3PO)
2. Create an incident event in CTI League's MISP
3. Create a folder for the incident in the team googledrive

4. Add notes to the ticket using /disinfocomment, add observables to the MISP event, add notes to a doc in the google folder
5. We coordinate with responders individually at the moment, but we're also working on tech alerts:
    ● MISP: we add to the MISP so others can read and act on the incidents in it
    ● IRs: we're working on this

https://app.gitbook.com/@cogseccollab-1/s/the-big-book-of-disinformation/ has how-tos for most of the things we do. (the original team version is in The BigBook of disinformation response)

Getting yourself started with this group

1. Say hi in slack (#4-disinformation)
2. Get set up in the team: fill out our survey form
3. Come to the team meeting!

Other Team Tasks

Team tasks:
● Development kanban - build the tech we need to do that better/faster
● Operational kanban - all the non-tech things, including writing processes and how-tos

FAQs

● Q: Do we just cover Covid19? Mostly, but it's okay to include other topics if they're part of this immediate timespan. TL;DR: we do care about disinformation around current events. We're not so concerned about people talking about aliens.
